

FreeTEL System launches new VOIP website

FreeTEL System has set up a new Website, which will sell VoIP services to home consumers, business users, travelers, everyone who wants to use the cost-effective online calling.

The new website promises to offer a range of customer-friendly services. They full technical support, services and features FAQs, and much more. The web site also aims at educating the consumer about VoIP in detail, including definitions, cost-benefit analysis, etc.

The VoIP market is getting competitive. Let us hope FreeTel's new service manages to stand out in this crowded market.
