

## **FreeTEL System Launches New Multi-lingual Website**

Monday May 15 2006, 10:03am PDT - Bhagaban

FreeTEL has opened a new multi-language website for its VoIP users. The multi-language website will be benefiting the customers to receive and communicate with the language of their choices.

In order to draw peoples' attention, FreeTEL developed quality contents in the site. The website will basically focus on latest news, product information, technical information and other such important information in three different languages English, French and Vietnamese.

This is a move apparently to make a common platform for the people to share their feelings, expressions. The new website will also help the company to realize the mood of the customers.
