

# FTS-P100 Broadband Internet Telephone

## Step by Step Installation Guide

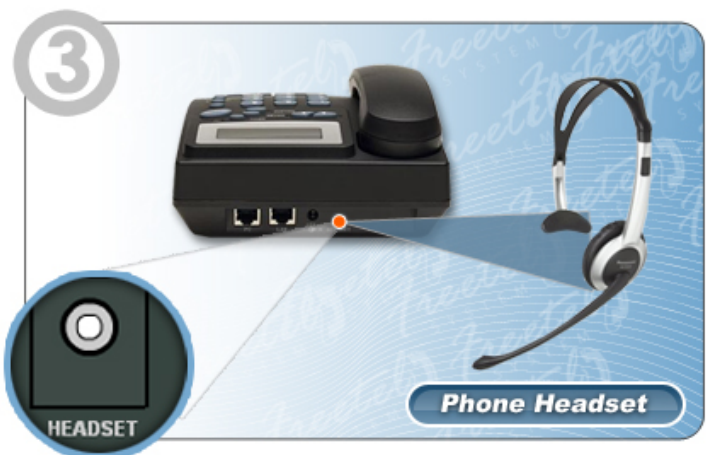

FTS-P100 Broadband Internet Telephone

Connect the LAN Port of FTS-P100 to your DSL, Cable, DirectTV or Wireless Modem/Router with an Ethernet Cable.

Optional: Connect the PC Port of FTS-P100 to the Ethernet Port of your computer with an Ethernet Cable if you have a computer.

Optional: Connect any regular Telephone Headset to the Headset Connector of FTS-P100 if you want to use a headset instead of FTS-P100 handset.

Plug the Power Cord into the +5V Connector of FTS-P100 and an Electrical Outlet. This step will turn on the FTS-P100.

**Important:** You must wait at least five minutes before using your phone and do not turn off the FTS-P100 during the first ten minutes. Also, you do not need to unplug FTS-P100 when it is not in use.
