## FTS-V100 IP Video Phone Step by Step Installation Procedure

Connect the NETWORK Port of FTS-V100 IP Video Phone to your DSL, Cable, DirectTV or Wireless Router with an Ethernet Cable.

Optional if you have a computer: Connect the PC Port of FTS-V100 IP Video Phone to the Ethernet Port of your computer with an Ethernet Cable.

Optional if you want to use a headset instead of the FTS-V100 IP Video Phone handset: Connect any regular Telephone Headset to the Headset Port of FTS-V100 IP Video Phone.

Plug the Power Cord into the 12V DC Connector of the FTS-V100 IP Video Phone and an Electrical Outlet. This step will turn on the FTS-V100 IP Video Phone.

Optional if you want to use an external Display or Video instead of the LCD of FTS-V100 IP Video Phone: Connect the RCA Output Ports of FTS-V100 IP Video Phone to the RCA ports of external display, such as LCD, Plasma or TV set.

**Important:** You must wait at least five minutes before using your IP Video Phone and do not turn off the FTS-V100 IP Video Phone during the first ten minutes. Also, you do not need to unplug FTS-V100 IP Video Phone when it is not in use.
